18 tonne fuel bowser

an adapted bowser for large-scale, remote construction sites

The T&M 18 tonne fuel bowser is our signature bowser. We understand what it takes to run a modern construction site, and the cost of having plant out of action. The 18 tonne fuel bowser is engineered to meet the needs of the UK's largest, harshest and most critical infrastructure projects. Our backroom fuel monitoring service provides real-time fuel usage data, highlighting inefficiencies on site before they impact the bottom line. Our drivers are ADR qualification compliant, CSCS card holders with fit-to-work medicals.

intelligent innovations for efficient fuel delivery

The 18 tonne fuel bowser comes equipped with a 200 litre capacity AdBlue delivery system and designated nozzle. Fuel is delivered through a state-of-the-art Banlaw delivery system, with the highest flow rate on the market - refuelling up to 75% faster than standard pump systems. Alpeco inline fuel meters, ball locking mechanisms and automatic shut-off systems are built in for enhanced safety. Tanks are tested to the highest standards, with full roll-over liquid retention systems.

TECHNICAL SPECIFICATION

- Mounted on 18 tonne chassis
- Four-wheel drive
- 10,000 litre fuel capacity
- Dedicated AdBlue tank
- Banlaw fast delivery system
- 75% faster refuelling
- Alpeco inline fuel meter
- Separate pumps for dual fuelling
- Chapter 8 compliant
- Built to BS EN 13094
- ADR vehicle
